

TARRYN MICHELSON

Program: International Academic Program-University of Sydney Exchange

College: University of Wisconsin, Madison

Major: Conservation Biology and Environmental Studies

Country: Australia

Australia is fantastic! Four months fly by quickly especially when your days are packed with school, an internship, sightseeing, and jet setting around the country. In Sydney, trips to beaches and around the city fill my weekends. I've seen the Opera House and the Harbor Bridge, tanned at Bondi, and had breakfast with koalas to name a few. When I have enough free time, you can catch me on the first plane out to see this wonderful country. So far I've been to the Great Barrier Reef, Cairns, Gold Coast, Brisbane, Byron Bay, Melbourne, Whitsundays, and Uluru (aka Ayer's Rock). I've seen and done so much I can't imagine going back to real-life.
